| 1500                                     | 2 x 500mm + 1 x 400mm          |

# Technical Information

## Module Sizes

The accurate axial distances & lengths for Eden system are:

L625 = 625mm

L665 = 666.5mm

L1000 = 1000mm

L1250 = 1250mm

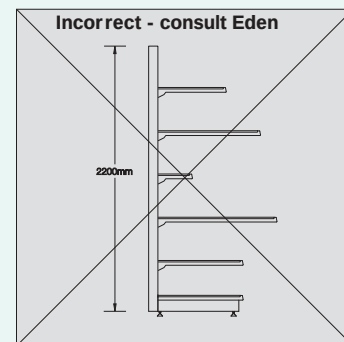

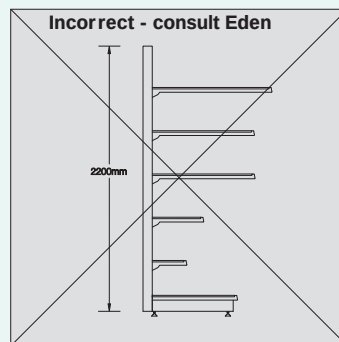

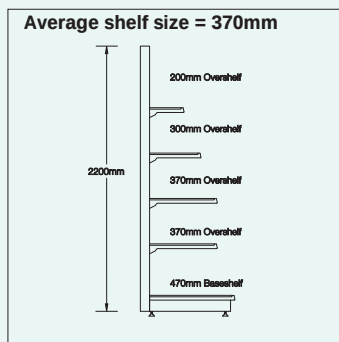

L1333 = 1333mm

All uprights are based on a 50mm pitch

# Weight Loadings

## How to calculate recommended weight loadings:

1. The overall weight loading of a bay depends upon the upright height, size and depth of the overshelves.
2. An overshelf must never exceed the depth of the base shelf and must always be arranged with the shelf depth increasing from the top to the bottom.
3. Take the average size of the overshelves, and use this as the guide for the maximum weight loadings on Table 1. This gives the maximum weight loading for a single-sided wall bay or gondola, excluding the base shelf loading.
4. Take each individual shelf size on Table 2 to give you the maximum weight loadings per individual shelf size for that bay.

**Table 1**

## Weight loads for wall shelving and gondolas in Kg

|            | 2210mm height upright | Average shelf depth |       |       |       |       |
|------------|-----------------------|---------------------|-------|-------|-------|-------|
|            |                       | 370mm               | 470mm | 570mm | 670mm | 770mm |
| 60 x 30mm  | 260                   | 210                 | 150   | N.A.  | N.A.  |       |
| 80 x 30mm  | 410                   | 360                 | 300   | 250   | 200   |       |
| 110 x 30mm | 600                   | 510                 | 450   | 400   | 360   |       |

|            | 1610mm height upright | Average shelf depth |       |       |       |       |
|------------|-----------------------|---------------------|-------|-------|-------|-------|
|            |                       | 370mm               | 470mm | 570mm | 670mm | 770mm |
| 60 x 30mm  | 290                   | 230                 | 190   | N.A.  | N.A.  |       |
| 80 x 30mm  | 490                   | 390                 | 320   | 270   | 240   |       |
| 110 x 30mm | 600                   | 510                 | 450   | 410   | 380   |       |

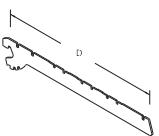

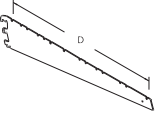

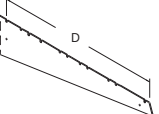

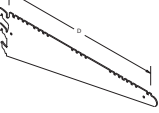

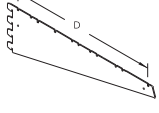

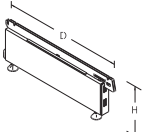

Stated loads are calculated for maximum recommended loading height of 2210mm and 1610mm high shelving bays. Weight loads or intermediate bay heights can be calculated by interpolating these values. Maximum weight loadings are shown for single-sided wall bays or gondolas excluding the base shelf. Shelf depths increase from top to bottom. For special configurations of height and depths consult **Eden Industries (UK) Limited**.

**N.A. = Not advisable**

|                                                                                     | D670mm | 450   | 370    | 360    | 320    |
|                                                                                     | D770mm | 480   | 350    | 340    | 300    |

The specified loads are developed in accordance with European Standard FEM 10.2.02 and RAL - RG614. Shelving bays must be merchandised with weight loads decreasing upwards. The specified loads presume even distribution of weight over the shelf surface. Regarding special loading requirements, please consult **Eden Industries (UK) Limited**. Drawings and illustrations are without commitment.

# Colour Information

## Standard Colours

Our catalogue prices are based upon the following four standard colours:

### Eden solvent-free powder coating

Our paint lines operate to strict standards of modern environmental production. Painted steel goods are 100% solvent-free, with only lead-free (TGIC) powder being used. In the pre-treatment plants only biodegradable (organic) chemicals are used. Electrostatic powder coating is used to produce a consistent, durable finish.

Other standard finish references:

012 = Die-cast  
003 = Zinc-coated

# Terms and Conditions

## Pallet Loads and Terms of Trade

Items marked as \* can only be supplied in multiples of the indicated pallet or minimum pack quantity. Note that items marked as \* will be supplied in pallets in the quantity specified. If the item is not marked this still represents the minimum quantity, although the actual quantity per pallet may vary.

All list prices as issued based upon this catalogue will be on an Ex Works basis unless otherwise agreed.

### Short lead time premiums

The standard prices will apply to the lead times as detailed in this catalogue. If orders are placed and accepted at shorter lead times the following premiums will be applied:

less than 3 weeks from individual item lead-time: 20%

### Minimum Order Value

The minimum ex-works pallet order value that will be processed is £5000 ex-works .If an urgent order value less than this is minimum value is required then a admin charge of £150.00 per £1000 order value will be charged with the minimum order value set at £1000. This must be agreed before an order can be loaded and is separate to any short lead premium applied to the order.

### Raw Material price movements.

The issued price list will detail the qualifying month for all raw materials (and steel in particular) that the prices have been based upon. These prices will be held provided any raw material price does not move plus 5% of the qualifying rate and is sustained, or is known to be sustained as advised by the steel provider, for a period exceeding 6 weeks. In these instances a surcharge will be applied after a notice period of at least 4 weeks is given in order to reflect a price decrease or increase. If the increase in raw materials rates is sustained at consistent levels for more than 9 months then the list price will be amended to reflect this and the surcharge removed.

# Ordering

## Pallet Loads and Terms of Trade (continued)

We would draw your attention to the standard Eden Industries terms and conditions which are available upon request. These are always shown as part of the order acknowledgement.

## How to Order

e.g. Grooved shelf - 70 system in jura white, L1000 D370

Part Number = 0421400

Colour code = 901

**Part number for ordering = 0421400901**

Please use all digits when ordering

Orders will be based upon the parts as detailed in this catalogue, the list prices as agreed and also reflect all the terms and conditions and qualifications as detailed in the Terms and Conditions section.

When received the order will be checked, and an order acknowledgement will be sent out that will confirm the date of delivery; this will be particularly relevant to any orders placed on short lead times.

## Non-standard Parts Manufacture

The flexibility and versatility that is available from our Mildenhall plant as the result of investment in modern sheet-metal production machinery, means that in addition to the range of parts detailed in this catalogue, we can also offer a bespoke service that is cost-effective whilst providing the added benefit of complete, proven compatibility with the standard systems on offer.

We are able to respond either to customers own drawings or make available, at an additional cost, our own design and development facilities in order to provide costs which will be based upon issued lead-times and minimum order values.
